CLEAN WATERFRONT WORKBOOK – 2008

The forms, examples and checklists included in this Workbook are compiled to help implement environmental Action Plans for marina development. Action Plans can be included as a supplement to current business plans and management practices; or used as stand alone capital improvement and funding programs.

Introduction

How to Organize Your Information
First Steps

Administration

Develop Alliances & Project Teams
Commitment

Clean Marina / Clean Boatyard

Prepare for Clean Marina Designation

Sustainable Building Construction

LEED Building Designations
Sustainable Construction Procedures

Environmental Capital Funding

Prepare Capital Funding Packages
Community Involvement Packages

Monitoring & Marketing

Develop a Waterfront Learning Center
Develop Marina Day promotion

The EWaterfront is a term used to indicate focus on holistic planning for the waterfront and local waterways. EWaterfront development blends the benefits of sustainable and green building techniques with marina construction and Clean Marina management practices. Ewaterfront development can be considered a method of environmental stewardship

Donations and proceeds from the sale of this and other Ewaterfront information benefit local Marina Day, Marina Day Kids and Clean Marina programs.
